PRODUCTION FACILITY CLASSES

Fork Lift

Anyone operating a forklift in a wine production facility is required by CalOSHA to have a certification card on file. Passing a written test and skills evaluation will give the operator a new three-year forklift certification card.

Confined Space

This CalOSHA required annual training for anyone who works with the cleaning and/or maintenance of tanks or any other identified confined spaces located in the production facility. During this class, we will demonstrate the use of a respirator and CO² monitor. A hands on demonstration of rescue techniques will be featured. Participants will receive a certificate of completion for their participation to present to their employer.

Lock out/tag out (LOTO) & production facility safety

This CalOSHA required annual training is for all production workers and covers the safe use, repair and servicing of powered equipment. This LOTO training will comply with the CalOSHA "Authorized Employee Requirements". In addition, we will review other production facility safety issues including slip and fall hazards as well as chemical handling. Participants will receive a certificate of completion for their participation to present to their employer.

First Aid/CPR

Course follows current Red Cross curriculum for First Aid and CPR. We will cover basic First Aid and CPR techniques to stabilize an injured worker for first responders. Participants will receive a certification card valid for two years from the American Red Cross.
